About

I am a Senior Software Engineer, with experience in both mobile & web developments, having Backend and Systems Architecture as my core area of expertise. Along the past years, the projects I have been involved with used a wide gamma of technologies such as Java, Node, PHP, React, React Native, Amazon Web Services in between others. I had the chance to lead small to big Dev Teams, having acquire the needed skills to manage successful productive teams.

Work

Gone

August 2013 — March 2017

CTO & Co-founder   http://thegoneapp.com/

Gone offers you the most value for electronics and gadgets you no longer use without the hassles of pricing, listing, or shipping. Main technologies used: Node, PHP, Docker, Titanium Appcelerator, Parse, React, React Native, Jenkins, Python, Django, NoSQL databases (AWS DynamoDB, MongoDB, Titan), MySQL, PostgreSQL, AWS (EC2, SQS, SNS, Lambda, ECS, RDS, CloudWatch, S3, Kinesis, OpsWorks, Redshift, Route 53, Elasticache, Cloudfront).

HIGHLIGHTS

- Integration with several third-parties systems
- Mobile Development
- System Architecture
- DevOps

Techstars

July 2013 — September 2013

Alumni   http://www.techstars.com/

Gone (former ProductGram) was privileged to be selected as one of 10 teams to participate in Techstars Accelerator Class of 2013

HIGHLIGHTS

- Techstars is the world's leading startup accelerator, accepting fewer that 1% of applicants.

NXTP Labs

February 2013 — May 2013

Alumni   http://www.nxtplabs.com/

ProductGram was selected to be part of the NXTP Labs Class of 2013.

ProductGram

February 2013 — August 2013

https://www.bloomberg.com/research/stocks/private/snapshot.asp?privcapid=269356842

CTO & Co-founder

ProductGram is an app to help users to sell and buy items through social networks (Facebook, Twitter, Instagram). In charge of design, develop and deploy the system from scratch running on AWS. Developing and publishing the mobile app. Also, several integrations with several APIs like: Facebook, Twitter, Paypal and Etsy. Main technologies used: PHP, Titanium Appcelerator, MySQL, Stackmob, AWS (DynamoDB, SNS, SQS, EC2, S3, Opsworks).

HIGHLIGHTS

- Mobile Development
- Web Development
- System Architecture
- DevOps

DevSpark

July 2011 — February 2013

Technical Lead   http://www.sparkdigital.com/

Technical leader of the frontend team. Helped to build an internal management dashboard from scratch using ExtJS/Sencha for a video transcoding company. Main technologies used: Java, ExtJS/Sencha.

HIGHLIGHTS

- Web Development

DevSpark

July 2011 — November 2011

DevOps   http://www.sparkdigital.com/

In charge of deploying and setup distributed systems on AWS. Custom tools for ingestion workflows adding output validation at large scale. Main technologies used: Java, SQLite, PHP, AWS (EC2, SQS, RDS)

Panvidea

December 2008 — July 2011

DevOps   https://en.wikipedia.org/wiki/Panvidea

In charge of building deployment tools to deploy and integrate testing, staging and production environments on AWS. Setup of Jenkins (CI) and automatic deployments (CD). Custom ingestion and delivery workflows tools for several clients. Main technologies used: Java, Spring, Tomcat, AWS (EC2, SQS, SNS, S3, RDS), Rightscale, MySQL, Riak, Jenkins.

Panvidea

December 2007 — July 2009

Software Engineer   https://en.wikipedia.org/wiki/Panvidea

Part of the core team in charge of design and architect the Panvidea's platform from scratch. Develop several distributed components using Java + Spring (REST API) running on AWS Cloud, involving high throughput file transfer and video transcoding. Main technologies used: Java, Spring, Tomcat, AWS (EC2, SQS, SNS, S3, RDS, SimpleDB), MySQL, Riak, FTP, SFTP, Aspera.

DSNET

December 2003 — April 2009

Web Developer   http://dsnet.com.ar/

Web development using several technologies like: PHP (own framework called Barakus, Symfony), MySQL, HTML, CSS, Javascript (Mootools, Prototype.js, jQuery)

Skills

Web Development

- React
- Redux
- CSS
- HTML
- Jest
- Mocha
- Javascript

Backend

- Java (Spring)
- Node (Express, Hapi, Serverless)
- PHP (Symfony)

DevOps

- Amazon Web Services (AWS)
- Ansible
- Chef
- Docker + Docker Compose
- Bash

Mobile Development

- React Native
- Titanium Appcelerator

Conversational Interfaces

- BotKit
- Amazon Lex

Misc

- Openlayers
- Web Scraping
- Automation, automation & automation
- Soccer

Databases

- MySQL
- PostgreSQL
- DynamoDB
- MongoDB

Education

UNCPB

December 2000 — December 2011

🎓 **Software Engineering**
